

Priority Standards

Coding and App Creation – Grades 7-8

The table below identifies the Middle Level standards targeted in the Innovations in Computer Science and App Creating class. These are the knowledge and skills designed to provide the foundation to be well-educated citizens in a computing-intensive world and to be prepared for careers in the 21st century.

Priority Standards	Description
KS 2.2A1	Create an algorithm or sequence or steps to accomplish a task.
KS 2.4B2	Design and develop a program by breaking a large plan into smaller modules using procedures and event handlers (if applicable).
KS 2.2A5	Create simple algorithms that involve variables, conditionals, operators, or logic.
