1999-2000	20,301

## II. District Enrollment Trends

The Olathe Public Schools has experienced continued enrollment growth since unification in 1965. This enrollment growth is a reflection of the young median age of the cities the District serves and the continued residential development within the District. Cities served by Olathe Public Schools, include the city of Olathe, routinely named one of the fastest growing cities over 100,000 in the United States.

Olathe Public Schools has grown from 3,687 students served in 9 buildings to over 30,000 students served in 59 buildings in its 53 years as a consolidated school district. Recently enrollment growth in the District has continued, but slowed, resulting from a decrease in live birth rates. However, this year the District anticipates growing by 91 students.

Enrollment projections for Olathe Public Schools are based primarily upon historic enrollment information and new residential building permit information. Historic enrollment information would include District growth rate, program growth rate, student location and promotion rates. Enrollment data has been maintained since unification in 1965, with particular weight given to information in the past 3-5 years. This information is supplemented with residential building permit reports. The school District is broken down into 91 study areas (map grids). Building permits are mapped each quarter and information about the permit [the type of housing product (single family or multi-family), the developer of the subdivision and the price of the unit] is entered and analyzed with geographic information system (GIS) software. Changes within fully-developed areas of the District are estimated based on promotion rates by grade.

This process has created enrollment estimates that are within 1.0% of the actual enrollment of the District over the past 4 years, leading to a great deal of confidence in the methodology.

While the District's methodologies have proven extremely accurate in projecting enrollment for the short-term, the District relies on Mid-America Regional Council (MARC) for long-term enrollment projections. MARC is a non-profit association of city and county governments and the Metropolitan Planning Organization for the bi-state Kansas City region. MARC provides longterm enrollment estimates for the metro area. Applying a ratio technique to those forecasts provides the District an enrollment of 43,000-45,000 students at full build-out.

## II. District Enrollment Trends

The following chart provides actual enrollment information since 1965 and projected enrollments through 2021-22.

All numbers represent student headcounts not FTE.

Year	Head Count
2000-2001	20,794
2001-2002	21,500
2002-2003	22,153
2003-2004	22,949
2004-2005	23,615
2005-2006	24,696
2006-2007	25,520
2007-2008	26,351
2008-2009	26,894
2009-2010	27,202
2010-2011	27,943
2011-2012	28,288
2012-2013	28,889
2013-2014	29,171
2014-2015	29,410
2015-2016	29,567
2016-2017	29,616
2017-2018	30,054
<b>2018-2019</b>	<b>30,145</b>
*2019-2020	30,097
*2020-2021	30,293
*2021-2022	30,208

\*Projected

As demonstrated above, the District is anticipating its first decrease in enrollment in 2019-2020. This would mark the first such decrease since unification in 1965. However, stronger than anticipated growth for 2017-18 may be signaling a higher than anticipated growth rate over the next several years which could negate this decline.
