IV. Historical Valuations, Levies and Property Taxes

Historical Trends Levies

The following charts provide historical comparison of rates, taxes levied and their relationship to personal income.

As can be seen from the surrounding graphs, the District has been able to maintain a fairly stable overall mill levy for the past 20 years, with minor fluctuations in the percentage of each of the individual mill rates.

While maintaining a relatively flat overall mill rate, until 2008 continued assessed valuation growth generated increases in revenue to accommodate the District growth. However, since 1992-93, when the state's first student based funding formula was put in place, the burden of funding schools has progressively shifted from the state (BASE) to the local level (taxes).
