

High School Options Parent Presentations

Planning for high school is an exciting time in students' lives. In Olathe, our vision statement is "Preparing Students for THEIR Future" and this includes an individualized approach and student choice as we ensure our students are college and career ready. Students can explore a variety of options including Career and Technical Education (CTE) Pathways, 21st Century Academies and two-year technical OATC programs. All of these options focus on today's high demand career fields and help prepare students for the world ahead of them.

Parents are welcome to attend *ANY* of the middle school locations to hear more about their student's High School Options. Families do not have to attend their school of residence. This gives flexibility if the date at your school of residence does not work in your family's schedule. Student presentations for 8th graders are during the day ahead of the evening parent presentations.

All presentations are from 6 - 7:15 pm.

| Date | Middle School |
|-------|------------------|
